

Press release Calendar Week 36/I

An economical hybrid excels

Toyota Prius even more efficient with Rameder towbars

It is hard to believe that the first hybrid production car, the Toyota Prius, is already 20 years old. Technological advances have made the battery ever smaller and the boot now takes 500l. But that is not always quite enough. Therefore, **Rameder**, Europe's market leader when it comes to automotive transport solutions, has come up with products that will make you carry bikes, skiers and other cargo too with your Toyota Prius.

Towbars are real all-rounders. Not only can they tow various kinds of trailers, you can also buy very practical bike carriers you can affix with a flick of the wrist, as it were. You can get both in **Rameder's** online shop at www.rameder.eu. A fixed towbar including a 13-pole electrical kit is available from €228. Now you can make use of the Toyota Prius' wake and carry bikes or even e-bikes safely and comfortably.

But there is space not only in the wake but also on top of a car. **Rameder's** huge portfolio provides a huge selection of roof racks to make the Toyota Prius take your luggage to any destination at any time - be it [skiers and snowboards](#) or [bicycles](#). Check out these categories for an overview!

Rameder's shop at www.rameder.eu also has other products that make a Toyota Prius even more versatile and transport easier.
